RunCopy output

How to:

1. Copy one example of items' prices from excel file and paste it in the field **List Harga**
2. Copy the items' units from excel file and paste it in the field **Units**
3. Copy the number of months from excel file and paste it in the field **Months**
4. Copy the bidding companies' target prices and paste it in the field **Targets**
5. Set the first item price for each targets in **Lock Price Item 1**

- If there is only one item, this field will be ignored and the bidding price will be calculated as follows;
Price = Target ÷ (Units × Months)

6. Click the **Run** button.
7. Copy the output.
